

Welcome to our public consultation

Thank you for taking the time to attend this exhibition for the proposed Killean Wind Farm. The event initiates the second round of pre-application consultation on this wind farm proposal that we are developing on the Killean Estate, approximately 2 km east of Tayinloan in Argyll and Bute.

RES believes in meaningful and effective consultation, and we aim to engage early with the local community and key stakeholders in order to facilitate constructive consultation. At our previous exhibition in November 2023 we presented our early stage plans to the community to seek feedback and identify any issues and concerns, as well as benefits and opportunities, to consider when developing and refining the design and delivery of the proposal.

The purpose of this exhibition is to update the public on the design, explain the changes that have been made since the November 2023 public exhibition and consultation period, and answer any questions.

A range of information is shared, including the updated site layout, environmental considerations, the likely turbine delivery route and community benefits.

In addition, we have provided visualisations comprising wirelines to help give an impression of how the site design and layout has evolved since the first exhibition in November 2023.

This exhibition forms part of our pre-application consultation and is designed to give you the opportunity to:

- **learn more about the proposal**
- **discuss any questions or views with our project team**
- **provide written feedback to RES on the proposal.**

Please take time to read the exhibition information provided and talk to our project team about any questions that you may have. All consultation feedback submitted to RES will be reviewed by the project team prior to submitting a planning application.
